WORK EXPERIENCE

AI-Native App Developer Intern | Avantro Labs

Feb 2026 – May 2026

- Built a full-stack **inventory management system** for NuPro Ventures, covering purchase orders, inventory tracking, and procurement workflows.

SKILLS

Languages & Frameworks: JavaScript, HTML, CSS, React, Node.js, Express, Tailwind CSS

Tools & Platforms: Git, GitHub, Firebase, Supabase, Vercel, Render, Cloudinary, npm, Claude Code

AI Development: Built and maintained custom Claude Code skills that turn manual dev/QA tasks into repeatable, automated checks.

PROJECTS

Mandi API | [Live API](#) | [GitHub](#)

- Built a **keyless REST API** serving daily agricultural mandi prices across **5 Indian states**, with endpoints for states, commodities, markets, prices, and trends.
- Automated daily **APMC data synchronization** using **GitHub Actions** and added rate limiting at **100 requests/min**.
- Contributed the API to the **public-apis** open-source repository through [PR #6789](#).
- Built a **React + Vite developer portal** with an interactive API playground, code generators, and SEO-optimized static-prerendered pages via a Puppeteer build step.

verify-claims – npm Package for Documentation Testing | [npm](#) | [GitHub](#)

- Published [@shrinivas-sn/verify-claims](#), an MIT-licensed npm package for validating documentation claims against executable commands.
- Reported the exact file and line when documented build, lint, or other claims become outdated.
- Designed the claim syntax as an invisible **HTML comment**, so annotated docs read normally to anyone unfamiliar with the tool.

Promptly – AI Prompt & PRD Generator | [Live App](#)

- Built an AI-assisted **PRD generator** powered by **NVIDIA's Nemotron** model, proxied through a **Supabase Edge Function** to secure the API key and handle CORS.
- Implemented **Supabase** authentication, project persistence, version history, and Markdown export.
- Designed a **three-tier adaptive wizard engine** spanning **40 project-idea tracks** (SaaS, e-commerce, marketplace, and more) that composes platform and idea-specific questions into a structured 7-part PRD template.

Calendar API | [GitHub](#) | [Live App](#)

- Built and deployed a Node.js/Express REST API filling a gap in publicly available Indian holiday data – covering **28 states** and **8 union territories** with a database-free JSON architecture on Render.
- Implemented **5 endpoints** – holiday lookups, is-holiday checks, next-holiday lookahead, date-range queries, and a **leap-year-safe calendar generator** – merging central and state-level data with automatic deduplication.

EDUCATION

KLE Technological University, Hubballi – BE in Electronics & Communication Engineering CGPA: 6.69
